

Louisiana Tech Cyber Student

Louisiana Tech University is a selective-admissions, comprehensive public university. Louisiana Tech is committed to quality in teaching, research, creative activity and scholarship, public service, and workforce/economic development. Louisiana Tech maintains as its highest priority the education and development of its students in a challenging environment within a safe and supportive, diverse community of learners.

The Louisiana Tech Center for Information Assurance is a National Security Agency (NSA) Center of Academic Excellence in Cyber Defense Research and Education. The mission of the Center for Information Assurance is to foster, support and conduct innovative education, training and research in information assurance, cyber security and cyber defense of computer information systems across all types of industries for the state of Louisiana and the

Southeastern United States.

The Center considers a key aspect of its mission to be the support of doctoral education and research in cyber security, cyber deterrence and information assurance areas for the Louisiana Tech College of Business in order to assure a supply of well-trained and capable information assurance and cybersecurity experts for the future. The Center offers an interdisciplinary, collaborative research environment that is led by the faculty in the Department of Computer Information Systems in the College of Business.
